# CHARGERS

allity.

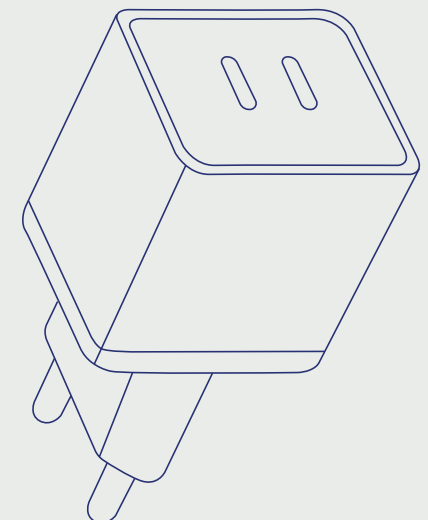

## WHEN IT COMES TO CHARGING YOUR DEVICES, SPEED AND EFFICIENCY MATTER.

When it comes to charging your devices, speed and efficiency are essential. Power Delivery (PD) has transformed charging technology by dynamically adjusting power output to meet your device's needs, resulting in significantly faster charging times. For example, while a standard charger might take 3-4 hours to fully charge a smartphone, Power Delivery **can get you to 50%** in just 30 minutes and fully charged in under 1.5 hours.

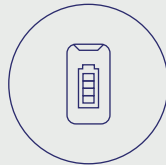

This technology not only speeds up charging but also optimizes efficiency, ensuring your device receives the right power at each stage.

**FASTER, SAFER, AND MORE EFFICIENT CHARGING EXPERIENCE.**
