

FINGER GRIP CASES

Aesthetic and handy Finger Grip covers are a unique series of products with a finger grip. Fashionable colors and a simple form of matte cases create an attractive whole. The product is made of TPU, which gives it adequate flexibility and durability. The finger grip has a built-in metal insert, which makes it easy to mount in magnetic holders. The handle can be used as a stand. The Finger Grip series has the necessary cutouts, perforations for the speaker and microphone, and embossing for the side buttons.

The cover effectively protects against scratches from the outside, but also from the inside. The interior of the Finger Grip is filled with a microfiber-like material. The safety of the device is also increased by the solid corners of the cover
