

RING HOLDER

Ring Holder is an indispensable gadget for all smartphone owners. It makes using your phone even more convenient and safe. The set offers many practical features.

One of the most important features is the stand function. It gives you the ability to freely watch movies, participate in video conferences or view photos while holding the phone on a desk or table. This is ideal for those who like convenience and practicality.

Equipped with a 2100 Gs magnet, it provides a secure and safe hold on the phone. The rim keeps the device in place, even during sudden movements. No need to worry about accidentally dropping or moving your phone.

The Ring Holder is extremely easy to use. You can easily detach it from the overlay when you don't need it, and then reattach it whenever you want. Its slim design does not interfere with the phone's original look. It comes with two metal rings that can be used on two different cases.
