The Gold Frame Mag Case is a phone case designed specifically for iPhone users. This aesthetically pleasing cover not only provides protection but also offers practical features that enhance the convenience and functionality of using an iPhone.

The case has been meticulously crafted with attention to the smallest details. Its sleek finish gives it an elegant look that complements the modern design of iPhones. The highest quality materials have been used, ensuring durability and resilience.

The interior of the case is lined with microfiber, which not only provides a soft cushion for the phone but also protects it from scratches and dust. The microfiber is gentle to the touch and poses no risk of scratching the screen or the phone's body.

It features precisely cut openings for the charging port and volume buttons. All ports and buttons are easily accessible, ensuring full functionality without the need to remove the case.

The most important feature of the case is the built-in metal ring, which is compatible with MagSafe technology. This eliminates the need to remove the case for wireless charging. This is a novelty among iPhone cases as it enables convenient and safe use of this technology.

## ATTRIBUTES

- MagSafe available in a cover
  - aesthetic finish
  - microfiber lining
- refined cutouts for the charging socket and volume
